### The Bahaist Movement

BAHAISM was born in Persia, where it was first preached by Ali Mohammed, whom his disciples called "Bab," or door. The sect has grown in numbers and is regarded as a hopeful religious philosophy.

Dr. Strickland, inventor and physician, lives in a quiet little settlement in the mountains with his daughters, Alix and Cherry, and his niece, Anne, who keeps house for him. Peter Joyce, a young man of means, has long been in love with Cherry, but has never told her. Martin Lloyd, a new-comer, marries Cherry. Peter, inconsolable, goes abroad. Cherry finds life without money difficult and she has words with Martin. Dr. Strickland dies. Anne claims a \$10,000 loan made years before. Peter returns and marries Alix Cherry leaves Martin and comes to her sister's new home, declaring she will never return.

"How you talk, Alix. What else could she do? I don't think you understand what Cherry's been through. Think of her pride!"

Peter had become an ardent champion of the runaway wife, and Cherry resolved not to lose one iota of his sympathy.

She crushed the letter in her hand. "I think I've been through about enough," she said. "What do you know about it, Alix? Here you are with everything money can buy and you pretend to preach to me about living with a man who's little better than a common laborer. I won't stand it!"

## WHY CHILDREN HAVE COLDS

-By Brice Belden, M. D .-

OLDS in children are popu- position to colds through habitularly supposed to result from exposure to cold or wet. As a matter of fact, they are caused by micro-organisms and therefore a cold is really an infectious fever. The cold or wet, particularly if they lead to prolonged chilling. may favor the onset of a cold, but they are not the actual cause.

It is because a cold is an infection that young children should be protected against contact with any one suffering from one. This is more important in children than in adults, because a cold is more apt to result seriously in a child than in an adult, and because children are more susceptible to colds than adults.

Children can acquire a predis-

ally faulty hygienic surroundings. Such are the children who do not (Copyright, 1922, by King Features get enough fresh air. They are sometimes found living in overheated rooms, sleeping with closed windows, and being protected against "draughts" while kept in stuffy and polluted air. This "air sewage," as it has been properly called, is as pernicious as any other kind of sewage, and its drainage can only be accomplished

Children who suffer from adenoid growths or chronic tonsilitis are especially susceptible to colds.

by good ventilation.

Prevention is better and easier than cure. Of first importance is fresh air in abundance. Living rooms should not be heated above 68 degrees F. Steeping rooms must be well ventilated. Delicate children should not be pampered or coddled. Upon rising the chest, back and neck should be sponged with cold water.

Underwear should be of the lightest weight in summer and of medium weight in winter. If adenoids are present they should be removed, and the same thing is true of chronic-lly affected ton-

TRAFFIC block delayed me twenty minutes, and so I didn't get home until after 7 on the evening when Carl Booth was to dine with Carlotta and me. Still I thought nothing of it when I heard voices from the library as unlocked the front door of house and hurried toward the stairs. And I didn't slacken my pace until I heard Carlotta calling

after me: "Well, Anne! Whither away so fast? Have you forgotten that there's a guest dining here and that you weren't home to introduce us properly?"
"Carl isn't here yet!" I half ex-

Jokes That Are Best. THE man worth while is sure

to smile at anything that's funny; he knows full well that laughter's spell can make dark hours sunny. So mirth's the rage on screen and stage and fills the funny papers, and staid old men grow young again perus ing comic capers. They split their vests at foolish jests and hurt their sides with laughing, while joy rings out in merry shout and shakes the topmost rafter. though bright folks are fond of jokes that keep them blithe and merry, the favored pun first saw the sun with auk and cassowary. Men cry "Tee-hee!" and roar with that have been sprung since Rome was young and Carthage was a boomer. The hoary jest still suits folks best for some unfathomed reason, and "Ma-inlaw" makes men guffaw in every age and season. Our granddad's puns are still the ones that bring the blithest chuckles, and make men shake until they ache and off hooks and buckles. "Oh, you're a line of this triangle all right! And I'm getting a line on it," replied Carl with sternness of the same mock-heroic variety as he pulled out her chair for her, giving preference to the hostess with that natural sense of breeding which has always been part of him.

Where he got it I don't know. For Cary, like Max Headley, has no background of which I am aware. He simply came into my life and became a part of it at a time when I wasn't conscious of the fact that the world nowadays has a way of wanting to know all about folks, and even goes so far as to inquire who your cousins and aunts and in-laws are.

The amiable comaraderie with which Carl and Carlotta accepted each other-his real interest in her and response to her made me a conceited idiot to lay so much stress on the moment when he'd forgotten himself. After all, even Carl might be capable of flirt (To Be Continued Thursday).

## FOR THE SPRING SEWING

-By Loretto C. Lynch-

An Authority on All Matters Per. + Canned vegetables and canned soups and canned fruits are all

taining to Management of the Household.

LMOST every woman does A some kind of sewing in the spring. And where the family is large and there are many garments to be made, there arises the problem of managing the home during these trying days.

Where the housewife undertakes to help the seamstress, time is lost and the work rearded if the helper must stop two or three times a day to prepare meals. And yet the family must eat. And so, before the seamstress is due, the housewife should plan the meals on paper and from the plan make up a shopping list. Practically everything not perishable should be in the house and part of the food cooked before the seamstress

Enough oatmeal or other cereal to last for two breakfasts should be cooked. Enough potatoes for at icast three servings should be made ready. Have enough bread ou hand

A whole boiled ham is a good investment. It lends itself to such a variety of ways of serving. It may be sliced for sandwiches for the noon meal or cut up and comtined with scrambled eggs it gives a two-minute hot dish, and if the housewife is particularly tired it might be sliced and served cold with hot canned peas and bread and butter for the evening meal.
